Scale: 4" = 1mile	Contract Number:			Mixed Hardwood*	2730	7600	80**
				Black Ash	*	*	30
				*MX pulp = 20% black ash, 75% maple, and 5% other **MX Saw = hard maple and soft maple			

Harvest requirements:

- Sale is being sold on a ticket scale basis.
- Access through private land has been secured by Bayfield County.
- Portions of the access road will require freezing wetland crossings. This must be done with minimal disturbance to the wetland soils which may require pushing frost into the road with a snowmobile or similar prior to work with a dozer.
- There is an active Bayfield County Timber sale that uses the same access road across the wetland. Depending on how much work is completed as part of the other sale, there are several areas of this road that may need a culvert or snow bridge to provide cross-drainage.
- Several small wet areas are excluded from sale with red painted trees. Do not cross or enter these areas with machinery. Follow all water quality BMPs.
- If harvest will utilize the whole tree, one in ten tops must be left scattered throughout the sale.
- Internal boundaries are red paint lines. External boundaries are red paint lines or blue paint lines. No equipment or trees may cross blue paint line.
- Unit NH: Harvest all orange-marked trees and harvest all aspen. Within green-painted gaps, harvest or sever all stems 1" in diameter and larger. Gaps are approximately 60ft diameter, indicated by two green dots facing inward on six to eight trees around each gap.
- Unit NH: Short wood forwarding is preferred in this unit. Pole skidding will be allowed only if purchaser can demonstrate that it can be done without damaging residual stand.
- Unit A and Unit SH are both clear cut units. Unit A is mainly aspen. Unit SH is mainly swamp hardwood. Leave all green-painted trees, leave all oak, and leave all conifer. Harvest or sever all other stems 2" diameter and larger.
- Do not damage any survey monumentation.
- Prior to moving equipment on to or off the sale area, scrape or brush debris and soil from exterior surfaces.
- Do not cut snags except those that pose a safety hazard to logging operations.
- This contract requires county authorization for all road/landing construction and places a number of other requirements on road construction and closure.
