- Harvest Requirements:**
- Sale will be sold on a Ticket Scale Basis
 - Sale includes multiple units with different prescriptions: Hardwood Gap Unit, Aspen Clearcut Unit, Oak Seed Tree Unit, Hardwood Seed Tree Unit
 - **HARDWOOD GAP UNIT** Gaps are noted on the map. There are 6-8 purple painted two dot marks facing towards the center of the gap with a purple slash on the backside of that same tree. Gaps are 66' in diameter and 330' apart. Sever all hardwood stems 1" in diameter and greater within the gaps. Do not harvest hemlock, cedar, or pine within gaps. There are no trees marked for removal between gaps. Contractor is responsible for navigating between the gaps in such a way to minimize damage to residual trees. Minimal operational trees may be taken focusing on the smallest and lowest quality trees.
 - **ASPEN CLEARCUT UNIT:** Harvest all hardwood stems 2" in diameter and larger. Harvest all fir and spruce 4" and larger. Do not harvest any pine, cedar, or hemlock. 2 Grouse trees were marked to provide for male grouse drumming habitat. These trees were painted with a large X on both sides of the tree with a ring of paint at 5' above ground level using purple paint. Sever these trees above the purple paint ring and leave the trees adjacent to the stump as close as possible on the ground.
 - **OAK SEED TREE UNIT:** Harvest all hardwood and fir/spruce 4" in diameter and larger not marked with purple paint. Leave all pine, cedar and hemlock.
 - **HARDWOOD SEED TREE UNIT:** Harvest all hardwood stems 2" and larger. Harvest all fir/spruce 4" in diameter and larger not marked with purple paint. Leave all pine, cedar, and hemlock.
 - Access will be off Van Stone road
 - Sale boundaries: As noted on the map the main road into the sale is the western boundary where no red paint was used. Everywhere else red paint was used to marked the sale boundaries and units.
 - Portions of this sale are on clay soils so extreme caution must be used outside of frozen ground conditions. County reserves the right to prohibit operations if damage occur or if damage is anticipated.
 - Do not cut snags except for those that pose a safety hazard
 - To comply with the Best Management Practices for Invasive Species: Prior to moving equipment onto or off of the sale area, scrape or brush soil and debris from exterior surfaces to the extent practical.
 - This contract requires County authorization for all road/landing construction and places a number of other requirements on road construction and closure. Upon completion of the sale the access road must be bermed.
